

HEAD HOLDER

CONTROLLING YOUR CATTLE COMFORTABLY

PRODUCT CODE: QC910

WEIGHT: 54 kg

DIMENSIONS (IN USE): 1232mm Wide x 667mm High x 318mm Long

The Second-Generation Q-Catch Head Holder takes cattle control to a whole new level. Designed to provide maximum control of the animal by immobilizing the animal's head. The two pieces of the head holder move in a synchronized, scissor-style motion to clamp around the cattle's head securely. This allows the handler up close access to the animal's head for any procedure necessary without placing unnecessary stress on the animal.

SPECIFICATIONS

- Height can be adjusted to work with animals of any size
- Patent pending dual friction lock with infinite adjustments is backed by a lifetime guarantee
- Single lever control
- Compact design ensures the head holder stays out of the way when not in use

PATENT PENDING

Arrowquip was founded in 1988 by the Firth family in Australia with the mission “To influence the livestock handling industry globally through the practical application of animal science and welfare standards, and increase producer safety and profitability with innovative equipment”. This inspiration came while working cattle on their family farm in Australia, due to the challenges they encountered with the lack of quality livestock handling solutions available to producers. As a forward-thinking family, they began to develop solutions to fill this gap in the market, and have been providing the high-quality livestock handling equipment farmers are seeking ever since.

Arrowquip is the only manufacturer to employ a full-time team of engineers dedicated specifically to livestock handling in our industry. Every piece of equipment we

develop undergoes an extensive development period in which our R&D Team exhausts every possible avenue to make our equipment the best it can be for farmers to work their livestock. As a result, our equipment is recognised worldwide as the most innovative and thoughtfully designed livestock equipment in the market today.

In the last 30 years, Arrowquip has become a world-renowned manufacturer of livestock handling solutions known for their innovative designs, technological advancements, investment in animal science, and forward-thinking equipment. Our years of research, equipment development process, extensive testing periods, and the refusal to settle for “good enough” have set a new precedent within the livestock industry.
