

RUMP FINGERS 101

FREQUENTLY ASKED QUESTIONS

WHAT ARE THE RUMP FINGERS MADE OF?

- Nylon 66

WHAT IS NYLON 66?

- This is a heavy-duty plastic designed to withstand extensive force and pressure
- Unlike some other plastics, Nylon 66 is not brittle

WHAT IS THE BREAKING POINT?

- Each rump finger can withstand 500 lbs. of pressure before deforming
- “We have had no reports of our nylon rump fingers breaking. We have seen a few bend, however these have been a result of user error and incorrect placement of the rump bar.”

- Jeff Langrell

• WHY DID YOU CHOOSE NYLON OVER STEEL?

- Steel rump fingers can be very loud when in use, and can also cause a lot of rattling when they are not being used
- Nylon minimizes operating noise while still providing a secure way to hold your livestock

ARE THE RUMP FINGERS REPLACEABLE?

- Yes, they can be easily replaced with one bolt if necessary

ARE THE RUMP FINGERS COVERED BY WARRANTY?

- Yes, they are backed with a lifetime guarantee
